

CONTENTS

**NONDESTRUCTIVE TESTING AND DIAGNOSTICS OF MATERIAL PROPERTIES
AND THEIR DEGRADATION IN USE**

Gorkunov E. S. Magnetic structural–phase analysis. Part II. 6

**THE RELATION OF THE STRUCTURE AND PHASE COMPOSITION TO THE
PHYSICAL-MECHANICAL PROPERTIES OF MATERIALS IN USE UNDER
EXTREME CONDITIONS**

Pugacheva N. B. Current trends in the development of heat-resistant coatings based on iron, nickel and cobalt aluminides. 51

Makarov A. V., Soboleva N. N., Malygina I. Yu., Osintseva A. L. The tribological performances of a NiCrBSi – TiC laser-clad composite coating under abrasion and sliding friction. 83

**SCIENTIFIC FOUNDATIONS FOR MATERIAL DESIGN AND DEVELOPMENT OF
EFFECTIVE TECHNOLOGIES OF MAKING MACHINE PARTS AND STRUCTURES,
INCLUDING THOSE TO BE OPERATED UNDER EXTREME CONDITIONS**

Nesterenko A. V., Novozhonov V. I., Zalazinsky A. G. Effect of deformation processing on the properties and structure of titanium obtained by plastic deformation of hydrogen-alloyed titanium sponge. 98

Vandyshev A. B., Kulikov V. A. Calculating the main parameters of a membrane reformer with a production rate of 40 m³/h designed for producing highly pure hydrogen from natural gas. 109
